

Plan for the gradual de-escalation of COVID-19 restrictive measures

A bridge of safety
towards a new way of
daily living

28 April 2020

Transportation

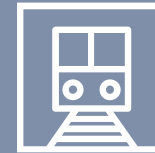

Transportation

Mandatory use of protective masks by employees and passengers. Application of this measure will be monitored by the control mechanisms in place

Adoption of measures for controlled entry to stations will be taken to maintain the necessary physical distancing rules

Increase of trip frequency to the maximum possible level from the very first day of the de-escalation of measures

Peak hours

Differentiation of employee arrival times and distribution across different time zones
(public sector, private sector, shops)

Recommendation for the use of Public Transport during peak hours only for absolutely necessary reasons (e.g. arrival and departure from work)

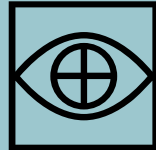

Recommendation for the use of private transport and suspension of Athens congestion zone, until the end of May

Other services

Continuation of taxi rules (one passenger allowed, with the exception of a parent with minors or a companion due to medical reasons).

Reopening of 'KTEO' by appointment only with the application of protection rules for staff and customers.

These restrictions will continuously reassessed according to the general strategy and its implementation in the coming months.
